gtpev@wamego.net

***EPD's listed in the catalog were current as of 2/2011
when the cattle were selected for the sale.***

Dear Cattleman,

You are cordially invited to join us for the 12th annual Lone Star Angus Alliance Female Sale. For years, the Alliance members have worked hard to performance test and measure their cattle in order to select the very best and improve the quality of their herds. This same performance data has not only allowed the LSAA members to progress, but has been the major driving factor for the growth seen by the Angus breed. While the LSAA members have all strived toward a common goal to improve their cattle, they still have enough diversity within their herds to provide something for everyone. I have personally selected these females for the sale and it is an honor to be affiliated with this group of Angus breeders.

Sincerely,

Casey Wornell

Pregnancy Information

All cattle have been pregnancy checked by a competent veterinarian or Bio-PRYN pregnancy test (blood) and called safe to the AI sire or pasture date. In respect to AI dates, they are not unconditionally guaranteed other than the fact that they are pregnant.

Understanding the \$Values

\$Values	\$W	\$F	\$G	\$QG	\$YG	\$B
	+24.07	+21.75	+20.12	+13.25	+4.94	+38.13

\$Value Indexes

\$Value indexes, are multi-trait selection indexes to assist beef producers by adding simplicity to genetic selection decisions. \$Values are reported in dollars

per head, where a higher value is more favorable. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires in the database if the sires were randomly mated to cows and if calves were exposed to the same environment.

Weaned Calf Value (\$W), an index value expressed in dollars per head, is the expected average difference in future progeny performance for preweaning merit. \$W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk, and mature cow size.

Feedlot Value (\$F), an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning merit compared to progeny of other sires.

Grid Value (\$G), an index value expressed in dollars per head, is the expected average difference in future progeny performance for carcass grid merit compared to progeny of other sires.

Quality Grade (\$QG) \$QG represents the quality grade segment of the economic advantage found in \$G. \$QG is intended for the specialized user wanting to place more emphasis on improving quality grade. The carcass marbling (Marb) EPD and ultrasound-derived percent intramuscular fat (%IMF) EPD contribute to \$QG.

Yield Grade (\$YG) \$YG represents the yield grade segment of the economic advantage found in \$G. \$YG is intended for the specialized user wanting to place more emphasis on red meat yield. It provides a multi-trait approach to encompass ribeye, fat thickness and weight into an economic value for red meat yield. \$G combines both \$QG and \$YG, and may be the best carcass decision tool for focusing on quality and red meat yield simultaneously.

Beef Value (\$B), an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning

Sells with a heifer calf sired by WAR New Design 5011 born 2/08/11 (BR 60 lbs.) Pasture exposed back to the same sire.

When was the last time your feed company gave you more pasture?

You can't keep forage quality from declining as it matures. But you can make more of what you do have with Purina Mills Controlled Intake

Systems featuring Intake Modifying (IM) Technology. You'll see:

- **24-hours-a-day/7-days-a-week Metered Nutrition,**

to help cattle more efficiently digest forage and consume more of it.

- **Increased grazing time,** 20% higher than hand feeding.

- **Improved grazing distribution,** for uniform use of your entire pasture.

When more of your cattle's needs are met through forage, they'll require less supplement intake – so you get maximum use out of your greatest resource, your forage.

Stop by your authorized Purina Mills dealer today and ask about Accuration, Sup-R-Lix and Sup-R-Block featuring IM Technology.
